IoT Roadshow Hosted by Intel

Aug 12, 2015 · 6:30 PM
Hacker Dojo

See and learn from an Intel IoT Roadshow participant who will demonstrate their project built on Intel's Edison platform.

The Intel® IoT Roadshow is a chance for all the Internet of Things lovers to have an opportunity to participate in workshops, get trained by experts on the Intel® Edison™, meet Intel staff and network with other makers.

The Intel® Edison development board brings hardware projects unparalleled performance in a small, low power form factor ideal for IoT and connected devices. The Intel Edison development platform packs a robust set of features into its small size, delivering great performance, durability, and a broad spectrum of I/O and software support. Check out some of the projects on Instructables!

Correction! Due to a mix up there will not be a Development Kit giveaway to the first 100 attendees. We do apologize for this. We will however be giving away 8 kits instead by a random drawing.

We didn't record it, but I'm looking to start doing that at future Meetups.
August 13, 2015

Philip R.

No tires were hitting the road in this meetup. The technology was at best nascent.
Thank you for the investment of time.

We are startup based in SJ. We have exciting products in hot field and we have very cool demos.
We are looking to add to team members - interested in marketing/sales people but everybody is invited, just be ready for a LOTS of very cool work. Exciting opportunity to join at an early stage - define your own future now - we are all here at the right place at the right time, dont let it pass by.

Elle (Elizabeth) W.

Hi all! Here is the discount code for those of you who missed it!
Code: battlefor5ghz_aug2015_partner_iotsv_10

Details for the WCA's 'LTE-U vs WiFi: The Battle for 5GHz' can be found here: <http://www.wca.org/>

Message me for questions!
August 12, 2015

Steve M.

Elle, How can I apply the discount code after purchase?

Great informative Meetup, thank you for hosting!
If anyone would like further information on demoing for my Sept. 17th Tech In Motion Meetup feel free to message me for details!!
August 13, 2015

John

I'd like to see more examples r case studies, or demo of building something simple
August 12, 2015

kumar

Good insights and exposure to what Intel Edison can do. Good to see the think simple nature of the tool kit. Thanks for the Rafael Give away. Hope to come back with an idea to demo in the next Intel IoT road show.
